### Summary

Junior Full-Stack Developer focused on the MERN stack and modern web technologies. I enjoy transforming ideas into working products — whether it's building responsive interfaces, designing clean backend logic, or connecting everything with reliable DB structures.

Right now, I'm developing in a hands-on environment with Umuzi as a Web Developer Recruit, working under real deadlines while improving code quality, version control workflows, and collaborative delivery practices.

### Frontend Development

- React · JavaScript (ES6+) · HTML5 · CSS3 · Responsive UI · Component-based Architecture
- SEO Principles for Web Development

### Backend & Databases

- Node.js · Express.js · MongoDB · PostgreSQL
- REST API Development · Authentication & Session Handling · CRUD Operations

### Tools & Dev Practices

- Git · GitHub · Docker & Testing Basics
- Agile Collaboration & Version Control Workflows

### AI & Data Knowledge

- AI Fluency Fundamentals · Prompt Engineering Basics · Data Preparation Concepts

### Top Skills

Problem Solving  
Programming  
Management

### Certifications

NQF-5 Business Analyst - micseta (Currently with Umuzi)  
Legacy JavaScript Algorithms and Data Structures

### Soft Skills

- Problem Solving · Communication · Accountability under Deadlines
- Continuous Learning · Ownership & Team Contribution

### Experience

Umuzi.org, South Africa

#### Web Developer Recruit | Feb '25 - Present

- Building full-stack web applications using JavaScript, MERN stack, and modern UI practices
- Implement clean, responsive layouts focusing on usability, accessibility, and SEO fundamentals
- Design and interact with APIs, handle CRUD operations, and work with database structures
- Work within Agile sprints: Git branching workflows, code reviews, pair programming
- Debug, refactor, and optimize features under real deadlines while maintaining code quality

- Participate in problem-solving challenges, improving analytical thinking and delivery speed

Bootcamp Participant, Gauteng, South Africa

**Full-Stack Development** | Sep '24 - Jan '25
